

任务7-3 单元测试

编写一个程序，完成对文件的复制拷贝。

```
2
3 old_file_name = input("请输入要拷贝文件名字: ")
4
5 with open(old_file_name, 'r') as old_file:
6     if old_file:
7         location_flag = old_file_name.rfind(".")      拷贝文件示例代码
8         if location_flag > 0:
9             file_flag = old_file_name[location_flag:]
10            new_file_name = old_file_name[:location_flag]+"[复印件]" + file_flag
11            with open(new_file_name, 'w') as new_file:
12                for content in old_file.readlines():
13                    new_file.write(content)
14
15
```
